Svedex style doors.

svedex

Welcome: Transform your home easily using Svedex doors.

Imagine:

You can now enhance your home with less effort than you thought.

It's simple.

Just choose from our extensive range of lacquered doors, designs to suit all tastes. Why not replace your tired and dated doors with one of our impressive styles. You can discover them on the following pages.

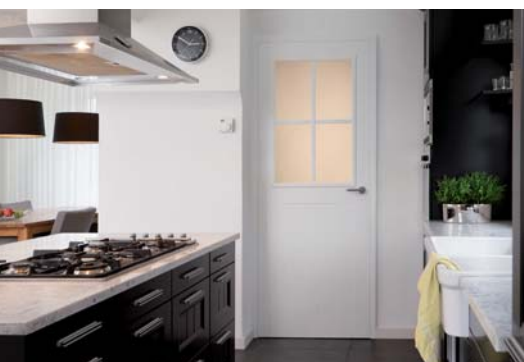

To enhance the life of your doors we only use a special high-quality lacquer. Our Superlak®: is extremely durable, easily maintained and fully guaranteed. Come see for yourself!

Lots of new products. Lots of choice.

New!

Versatility simply offers more choice and service.

Discover the versatility of Svedex. To an ever-increasing extent, our adaptable range is becoming our hallmark. This versatility makes it easier for you to choose the right door that perfectly meets your requirements. Versatility creates the opportunity to combine doors and styles, so more options for you to choose from. Versatility in top quality guaranteed by our tried and tested Superlak® paint finish, making a Svedex door the perfect investment.

Our new products:

Charmant, Frame, Cottage and Move 4

The new **Charmant** door range complements the ELEGANT style group perfectly. It is characterised by charming milling work that you won't forget and which stands out against the white lacquer, perfect and shiny, thanks to a new technique.

If you want an entirely new perspective, you could opt for the new **Frame** door range. In terms of design, it perfects the DESIGN style group, enabling versatile and innovative combinations. In the ELEGANT style group, it is the **Cottage** door range that surprises with its country house style, a breath of fresh air - even in the city. Our sliding doors programme hasn't stopped innovating and we can now present **Move 4**. We wish you lots of fun selecting the right door!

Svedex. A history of doors. With a future.

Svedex Random, model RD03

Svedex E-Lite, model AE34

The story of Svedex and its lacquered doors started well over 60 years ago. Established in 1954, Svedex built its first factory and began the journey to become one of the first companies in Europe to manufacture doors on an industrial scale. They were one of the first manufacturers in Europe to do so.

Because life
is colourful.
With white lacquer.

Superlak®: the invention.

In 1970, Svedex set up a production line using the patented EPC lacquer. This lacquer has an established and solid track record in quality and performance. The Superlak® is 100% solvent-free, with 0% emissions during production. This is the lacquer of choice for which Svedex is renowned. Because of this robust and scratch-resistant coating, a Svedex door will have a longer lifespan than other doors. Also, Svedex lives up to its quality commitments.

Affordable quality and sustainable vision.

Over the past 40 years, our product range has grown from purely smooth doors to approximately 240 different decorative models, always following our philosophy that beautiful doors must be affordable and of good quality. This sustainable vision, as it is called nowadays, is welcomed by the construction community in terms of environmental protection, choice of materials and corporate social responsibility.

Svedex, a network of specialised dealers.

It's important that you can see for yourself the quality and performance of a Svedex style door before you make the decision to buy.

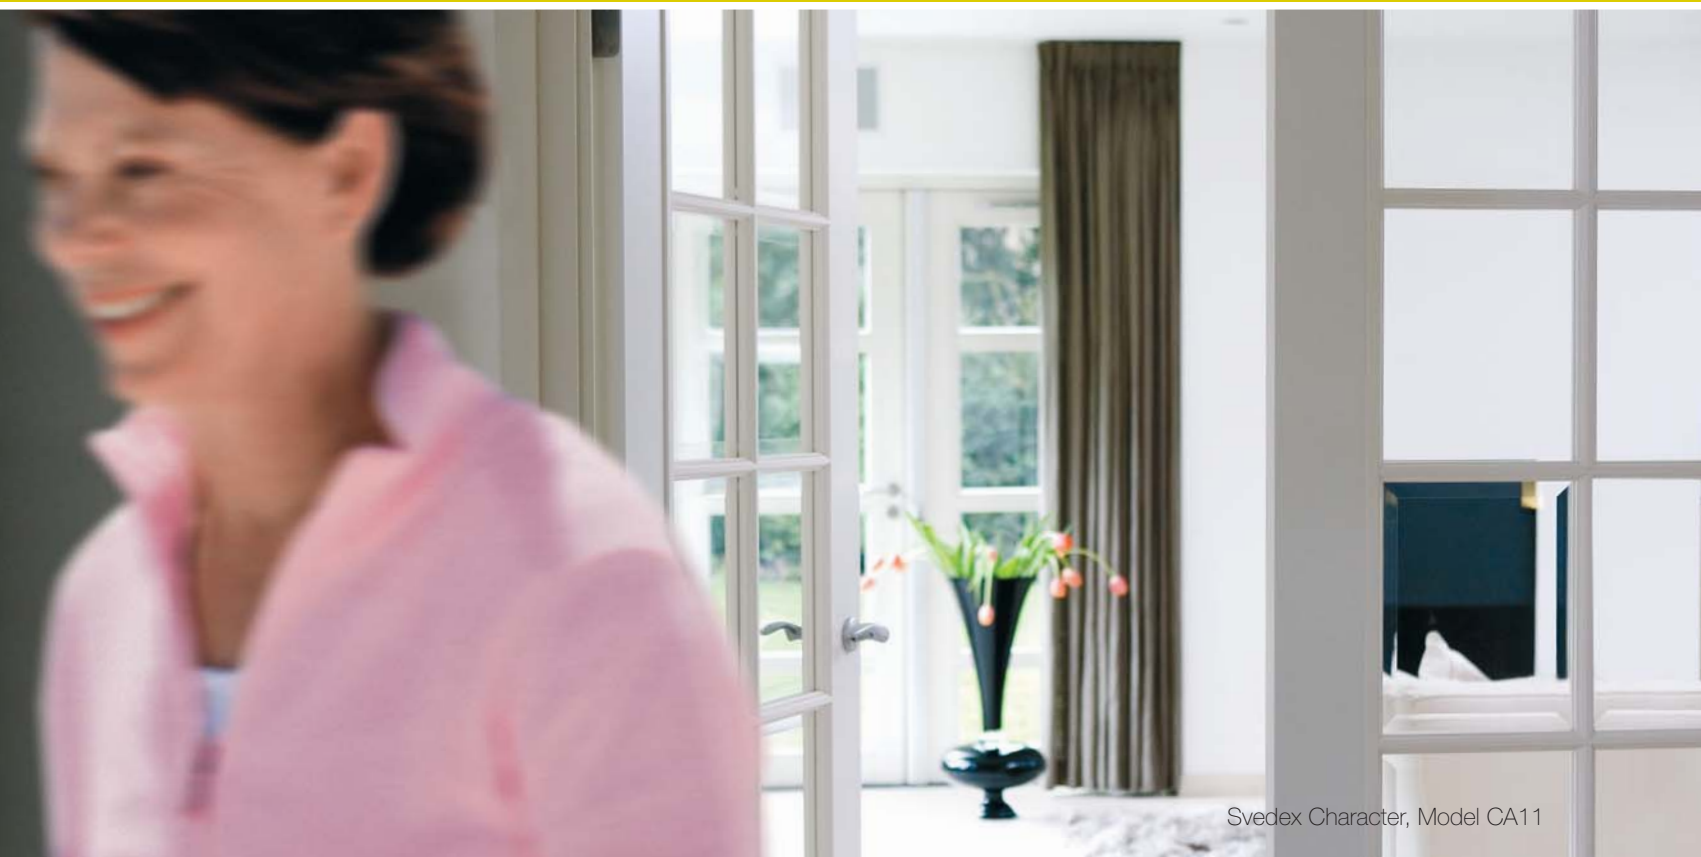

If you're asking yourself, how does the design present itself in daylight, or, what choices of design are available? Then why not make an appointment to visit one of our specialised dealers' showrooms.

>> More information about Svedex: www.svedex.com

Svedex is renowned for its excellent lacquer.

Lacquer that provides every door with that 'je ne sais quoi'.

A lacquer for life

We want the design of our doors to captivate, retain individuality and promote innovation. But as far as the lacquer is concerned, we make no concessions. Our Superlak® has proven this for over 40 years. This extremely resistant, solvent-free lacquer guarantees exceptional durability, an environmentally-friendly production process and, as a consequence, the full satisfaction of our customers.

With thanks to our Superlak® paint finish and our consistently high levels of quality and performance, we are now among the most respected manufacturers of white lacquered interior doors.

Reflection. Future Proofed.

We want our customers to be fully satisfied tomorrow as well as today. Therefore, we not only offer you doors but also products with a future: one supplier, providing matching doors, frames, door handles and fittings that will be available for a long time to come. Enabling you to switch doors, frames and fittings at any time. We also want you to feel confident buying our products. We make them with respect for the environment, natural resources and energy consumption. We continuously strive to optimise this process. Finally, we seek to ensure that you live in a healthy environment (our lacquer is 100% free of solvents).

The responsibility label.

Our customers can rest assured that we, as a FSC® and PEFC-certified company, only source our raw materials from companies that support sustainable forestry.

Our Superlak®: a product that is hard to ignore.

Tried and tested, and at the top for almost 40 years:

- Extremely durable
- Resistant to UV radiation
- Abrasion and scratch-resistant
- Washable and easy to maintain
- 100% solvent-free (no emissions during production)

Colours.

All style groups allow the choice between Alpine white and Extra white:
TREND, ELEGANT and DESIGN.

>> Added value through variation in lines.

NEW: Frame.

New!

Svedex Frame, FR505

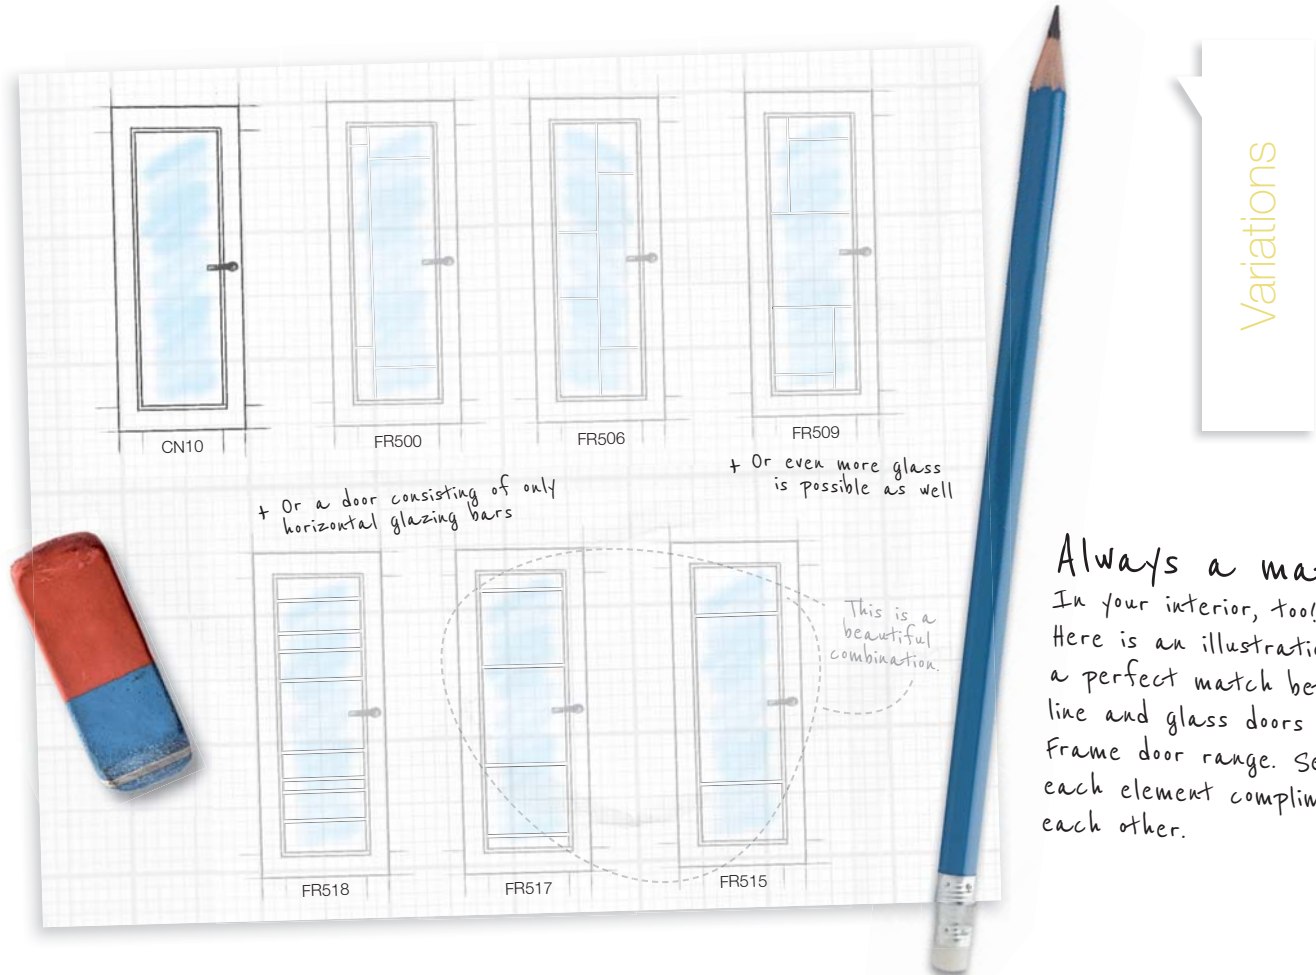

Frame your life!

Designed from a totally new perspective.

Anyone can create a door that fits their design needs. Numerous variations with stylistic lines and versatile glass sections. You will encounter no problems when combining our line doors and glass doors. You don't have to worry about style inconsistencies.

>> Continue reading **page 66.**

Simply choose what you want. More or less glass?

Always a match!
In your interior, too!
Here is an illustration showing a perfect match between the line and glass doors from the Frame door range. See how each element compliments each other.

Imagination knows no boundaries:
that's the idea behind the design of the Frame door range.

In Frame, the viewer sees what they want to see. The horizontal and vertical lines will embrace your imagination. To some, it's Mondriaan. Others say Bauhaus. But anyone can see that the design of this door allows any design dream to come true. With this door, everybody follows their own style.

Frame your life!

That is our message to you, our customer. Within the new Frame door range, you have a choice between 39 door models. Feel free to choose one design or a combination of designs.

It's really very simple. And the price tag isn't a problem either. All line doors and glass doors have one thing in common: the price. As such, Frame will both fit your personal style and your budget equally. It's clear: Frame offers you the flexibility in design possibilities, completely in line with your life.

NEW: Cottage.

The new Cottage door range: City, countryside, and enjoyment.

When Cottage was launched, it was given a charming assignment: To bring rural charm to the City and return an urban trend to the country. Thanks to its detailed finishing and new models, the Cottage door range looks modern, with plenty of variations.

New manufacturing technologies make the striking 'V' lines look more discreet, as they are now also finished with the Superlak®. Cottage's makeover is totally in line with what the market expects, while at the same time delivering a touch more 'sophistication' without devaluing its country house character. In other words, it's a modern interpretation of a rural tradition.

CT22

CT41

NEW: Charmant.

The ELEGANT style group's new likeable friend.

The Charmant door range provides a charming alternative to the ELEGANT style group. It not only oozes impeccable quality, it also houses large glazed panels. With the deep profiled lines, we create a design that's not only interesting but expressive.

The Charmant door range is on a par with the classic style doors: new milling techniques produce elegant lines, while the Superlak® coating provides the finishing touch. Style at its best, delightful to the eye.

CM15

CM08

Why search when the answer is right here! Style groups for any taste.

The Svedex style doors are designed to a very simple principle, namely to enhance your interior design. We have designed three main style groups, each subdivided into several impressive door ranges. There's something for everyone.

TREND

Trends come and go, occasionally they become part of the culture. With the TREND range, we offer you a selection of doors that will compliment any design. All of the doors are high-quality, durable and all are offered at an affordable price. The TREND range doors can become part of the family: whether you go into the bathroom in the mornings, walk into the kitchen for breakfast or stroll into the living room for a pleasant evening. They create individuality and a relaxing environment.

Svedex Character, model CA10

ELEGANT

Quality never fades. For the traditionalist, our ELEGANT door range will undoubtedly meet their demands. Timeless and classic designs that delicately fit perfectly into any traditional interior. In an elegant way the four ranges bring together the love for the authentic, with modern quality of life.

DESIGN

The design is the perfect combination of form and function, and at the same time a matter of personal style. Our DESIGN doors range is an inexhaustible source of ideas for anyone who wishes to express their personality in a specific style. Irrespective of their differences, all DESIGN doors stand for top quality and durability.

>> More information about Svedex: www.svedex.com

TREND

Trends can be a
momentary pleasure.
Or a joy for life.

Connect, ViVa en Linea.

The TREND style group consists of three ranges: Connect, ViVa and Linea. Each range distinguishes itself by its unmistakable features, affordable quality and no-frills design. They provide individualised solutions for anyone with a specific taste.

Svedex Connect, model CN05

ViVa

Straightforward, timeless design.

Connect

Versatility for any day.

Linea

On a par with individuality.

Combine to your heart's content!

When decorating your house, subtle combinations can create a stylish balance. Let the TREND style doors inspire you to find the perfect combination for your house. Why don't you combine a glass table in your living room with a glazed design door?

Vision ALG14N

Vision ALG14

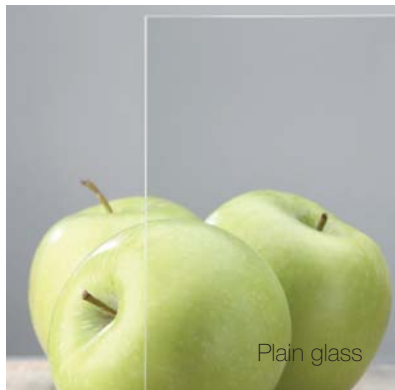

AL14

Architectural line.

The Gemini armchairs by Artifort have a clean, architectural personality. They can be upholstered in one or two colours. The top and bottom of the chair can be of a different colour, and the inside and outside can be finished differently. Available in a left-handed and right-handed version.

>> www.artifort.com

Plain glass

Satin glass

Do you like vision panels?

Shine the right light through your door and lifestyle, using glass elements. You can choose from various types of glass so that your glazing bar provides an individual touch to your door.

TIP

The current trend is to mix up styles.

The modest but multi-faceted design of the Linea doors range offers you the possibility to “re-configure” your interior. Try to mix up styles in your rooms by combining the furniture from the various spaces in a new way.

AL83

Easily placeable.

The T-Tray is an easily removable side table that can be put anywhere. The top can be pushed over the seat of a chair or sofa. The T-Tray is made of laser-cut aluminium and is very stable because of its cast-aluminium support. Available in various colours. Design: Roderick Vos.

Connect, doors with a modern edge to transform your interior.

What do you look for in a modern door? Quality and design? Numerous design options that fit your interior perfectly? In that case, choose the Connect models for your home! They are perfectly harmonised with your style and will beautifully enhance your interior. This range is also ideal for combining with panels, glass elements and linear designs in order to create an attractive, trendy door. The new Connect range meets all of our clients' requirements. Will you be our next satisfied customer?

Modern familiarity

>> Can be combined with grey glazing bars in woodgrain look.

Connect

One thing is for sure: everything looks different with glass.

The Connect doors range offers various finishing possibilities with glass panels, which will make your interior even more attractive. Choose from various sorts of glazing to achieve the desired lighting effect.

Glass panels with grey woodgrain effect glazing bars allow you to play with contrast.

This combination creates an intense contrast that can only be achieved with Svedex: the glass panel with grey woodgrain effect glazing bars works with the white doors beautifully.

The image shows a corner of a room. On the left is a white door with two glass panels and a black handle. The wall is covered in light-colored wallpaper with a delicate floral pattern. Two framed pictures of birds are mounted on the wall. Below the wallpaper is a teal-colored wainscoting panel. In the foreground, a small white wooden table holds a lit candle in a glass holder, a white ceramic vase, and a small white bowl.

ELEGANT

Maintaining values is important. Easy maintenance is even more important.

Classic, Cottage, Character and Charmant

The ELEGANT style group includes four ranges that combine love for the original with contemporary quality of life: Classic, Cottage, Character and Charmant. These door ranges stand for the values of those who always want to follow the latest trends. And thanks to their special surface, they are very easy to maintain as well.

Living - Today's inspiration 'par excellence'. For tomorrow's enjoyment.

Do you have your own, modern style? Are you often looking for inspiration for your interior? Then you will really enjoy the new Living doors range. A refreshing design, inspired by the play of lines, will be the decoration trend of tomorrow. These doors are also available in Extra white.

The difference is in the detail.

In addition to a standard Alpine white colour, Living also allows you to opt for Extra white. If you like white, you will certainly appreciate Extra white.

Colour.

You can choose between Alpine white and Extra white. This applies to all TREND, ELEGANT and DESIGN style groups.

Two shades
of white

Living

Modis - Man needs structure. Even to relax.

Are you looking for a new lifestyle? Do you like structured, but non-formal, spaces? This door range allows you to make a difference, thanks to the design of the varied narrow and wide lines, which your guests will simply adore. The result is crystal clear: modern design with straight angles that leaves plenty of room for personal decoration.

Random - Symmetry isn't everything.

Do you like to be surprised? And are you open to innovations that can enhance your life? In that case, we are pleased to welcome you to the world of the Random range. Here, being different is a system. There are often no right angles in the design. But this is precisely what softens the symmetry of the rooms and offers a new perspective. The principle consists of evoking an unexpected effect, which the lines or the connecting elements between the glass panels create.

Frame - Pure individuality. Endless possibilities.

Do you have a clear idea of the direction you want your design to go? If so, the new Frame doors range is in line to compliment your design. Line doors, with impressive milling work, follows a clear concept: versatility. Additionally, you can choose from the exclusive range of glass doors, detailed with glazing bars that are perfectly in line with the theme. These doors are truly a delight to see. Everything is focused towards individuality.

>> Variation and versatility
Frame comes up trumps.

Glass at its finest.

Transparency brings in light and brightens any room. Illuminate your room with the options available from the new frame door range and reflect your style. See how the glazing bars match the symmetry of the flush doors, creating the perfect opportunity to combine designs. A beautiful shape instead of just the shape.

Long live the clear line.

The Frame doors range is love at first sight. The horizontal and vertical detailing create a unique door profile. In it, you will recognise a pattern, a signature of a famous designer from the past. Here, the right angle works as a style element, and matches the line pattern of each room harmoniously. The interior is brought to life simply by being there. That's how striking architecture can be.

Svedex Vision.

The transparent initiatives of Svedex.

Svedex Vision, model RDG52N, and Random, model RD52

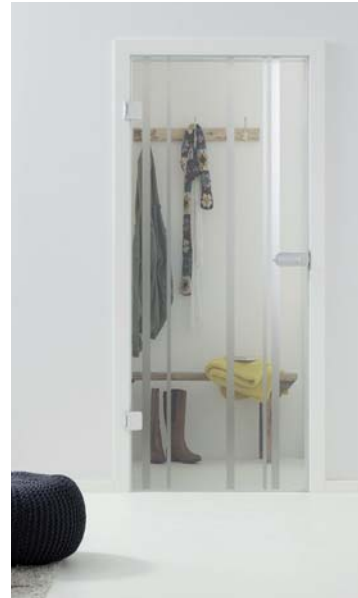

A door is more than just a link between two rooms. It's part of the décor that reflects the character and atmosphere of the room. A closed door can still brighten and enhance a room when glazed panels are cleverly used. Vision is the name of our fully glazed designs. Available with either matt or clear glass according to your preference.

>> Many combinations possible.

Svedex.

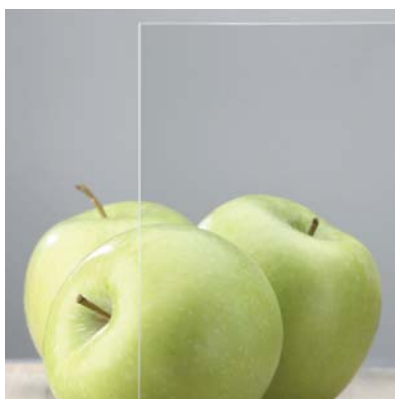

More than a door that opens up
your world. That is Svedex!

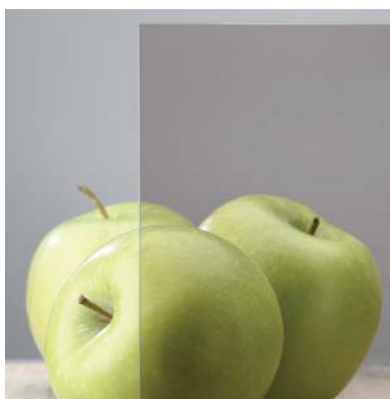

A bright delight.

Of your choice.

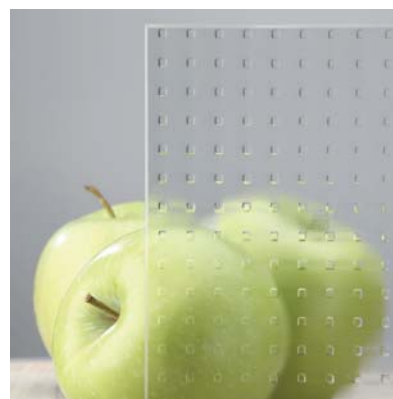

The glass elements in the Svedex style doors can perform various functions. They allow more light in and can provide pleasant lighting effects in the room. To realise the desired glass panelling effect, we offer you a wide range of glazing: a bright delight!

Move sliding door systems

Even more movement in the room

Svedex, Move 4

The Move sliding door system is second to no other Svedex door range. There is plenty of choice, but you also have the option to create a tailor-made classical solution, using alternatives. There are 3 sliding door options to give even more design choice. Irrespective of why you would choose a sliding door, with Move, you will find the solution that fits you.

>> Ask your specialised retailer for the technical details.

Svedex, Move 2

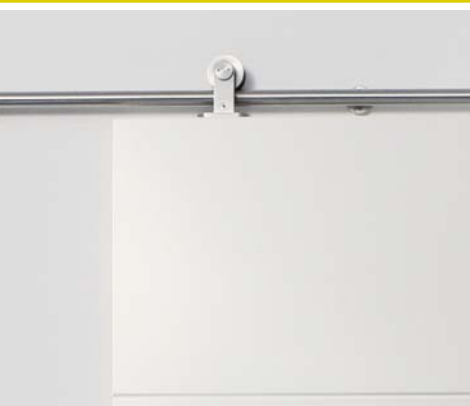

Move 2 stylish aluminium rails

Move 2. Invisibly open and closed.

The Move 2 sliding door system is extremely reliable and designed for regular daily use. The sliding mechanism is fitted at the head of the door and hidden behind a high-quality aluminium rail. Most of the Svedex door designs are available to be used with the system.

Svedex, Move 3

Move 3, elegant eye-catcher

Move 3. Elegant role play.

Move 3 turns each move you make with your sliding door in to a smooth operation. The cutting edge stainless steel wheels glide effortlessly along the engineered stainless steel top rail. If you combine this with stainless steel sliding door handles, the picture will be perfect.

Sliding door fittings.

New!

Svedex, Move 4

Move 4, stylish black

NEW: Move 4. In fashionable black.

With the new Move 4 sliding door system, Svedex is not just putting its money on colour accents. If you have fallen in love with black accents, you should combine Move 4 with Svedex door ranges. Just about any will do.

Sliding door flush pulls.

Beautiful
frames

A door on its own has no impact and no effect. Everything depends on the framing. Within this framework, we have developed a wide range of door frames, adapted to every door style. On this page, you can view all the possible designs. Even better, go and visit the showroom of one of our partner dealers.

TWIN

Square luxury (70 mm)

Profiled (65 mm)

Basic RE

Basic RR

Just as with a painting, a door's impact depends on the frame. The same is true for Svedex doors. You can choose from various frames to achieve the visual effect you desire.

TWIN

TWIN, a double opportunity for minimalists.

Technically, this is a frame with a system of double casings, and a sub frame. The in-built mounting, from a visual perspective, is the perfect and only system available for framing flush-mounted doors. Minimalists see their chances double: the lining of the doors and frames is perfect, corners and edges are limited to a minimum.

>> More information on: www.svedex.com

Fittings

The new collection.

In addition to the variety of doors and frames available, we have a range of fittings that is just as extensive. You can choose between round and square rosettes, surface-mounted or flush, but also opt for trendy fittings with oblong (right-angled) escutcheons. Almost all fittings offered adhere to the Class 3 norm, offer top-quality design at an affordable price, and are easy to fit.

>> Line variations.

Vision glass doors.

>> Vision is available, on demand, in different Svedex line variations.

The world of doors has its own language. We have the translation.

Below, you will find the most important terms in the world of doors, as well as the most important Svedex symbols. They allow you to determine the things that really matter.

Symbol for 2 milling lines.

Doors with this symbol are available with 2 different milling lines.

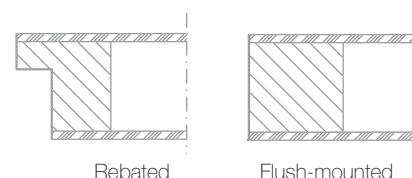

Symbol for 4 milling lines.

Doors with this symbol are available with 4 different milling lines.

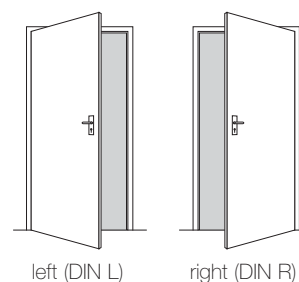

Built in.

In this variation, the door leaf is aligned with the frame as the door is closed, in order to create visual unity. The edges of the leaf and frame are not rounded off but flat.

Direction of opening.

This term refers to direction in which the door opens, i.e. to the left or right. If the stop is on the left side of the door, it hinges right.

Superlak®.

We guarantee that all doors with this symbol have been finished with Superlak®.

Tempered glass.

The glass element doors with his logo have been fitted with tempered glass.

The mark of responsible forestry

Symbol of our times.

As an FSC and PEFC-certified company, we source all our raw materials from companies that support sustainable forestry.

The costs are, of course, higher, but we believe this is the right way to do things.

Promoting Sustainable Forest Management
www.pefc.co.uk

>> If you wish to know more about Svedex, its doors, frames and fittings, please visit: www.svedex.com

Come and visit us online! You are welcome to visit our website at svedex.com

On our website, you will find all information about our products, our Superlak® and, of course, the address of your nearest dealer. If you already own Svedex doors, we would be pleased to provide you with tips about their maintenance. You are very welcome to come and visit our website, but don't be surprised if you encounter changes. We, at Svedex, are constantly working to optimize everything. For you!
